

### Preparation

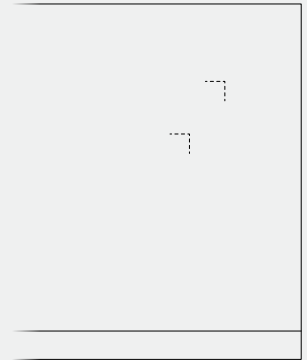

①

Make sure the surface is flat and clean.

②

If you want to make a pattern, we advise you to arrange it on the floor first. This way, you can adjust the pattern until you get the desired configuration.

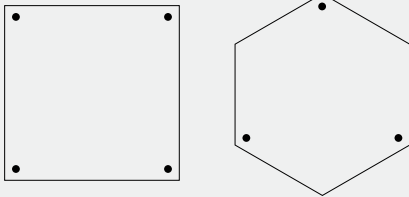

③

If needed, draw several reference markings on the wall itself.

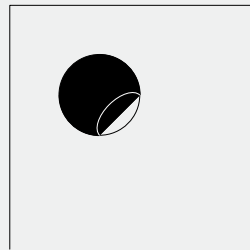

### Double-sided adhesive circles

You can mount PET Felt tiles on the wall using double-sided adhesive circles, included in your order. Follow these steps to mount PET Felt tiles the wall using the adhesive circles:

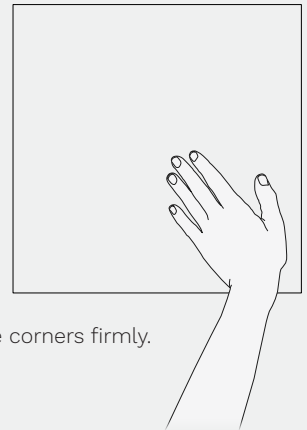

①

Stick the double-sided adhesive circles on the backside of the tile (4 per square tile, 3 per hexagon) and press them firmly.

②

Remove the paper from the adhesive circles and stick the tile directly to the wall. You can use a level if necessary.

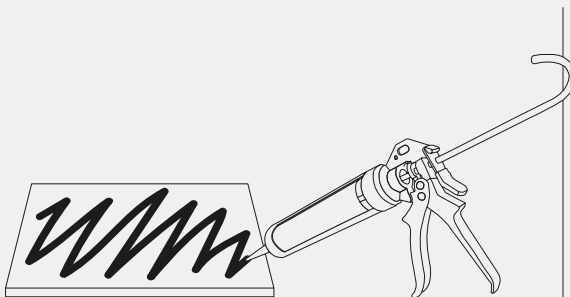

③

Press the corners firmly.

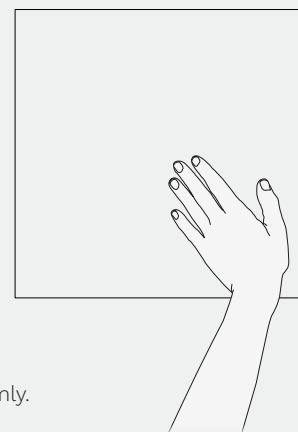

### Mounting glue

If you prefer using glue, our recommendation is Bison Poly Max High Tack. Please, read the manufacturer's instructions before the installation. Here is how to mount PET Felt tiles on the wall using the glue:

①

Apply glue evenly on the tile and stick it directly to the wall. You can use a level if necessary.

②

Press the corners firmly.
